unlock (E2SE's Take): salts from storage, login to the key server, master key opened
1. what is the latest version?
the head (n, h)
2. download the vault
a sealed vault
3. accept only if all three hold:
the version inside the vault is n
the fingerprint of the vault is h
the seal verifies
all three hold:
accept, write the file
any one fails:
refuse, write nothing
